Exhito

Style in technology

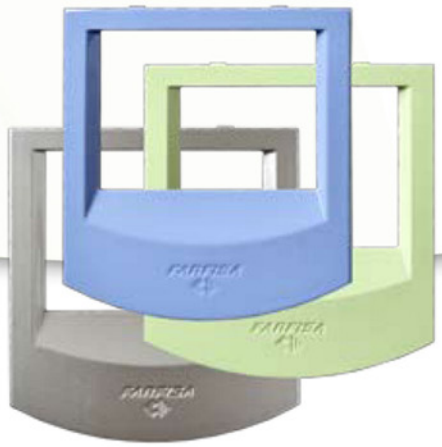
Here is Exhito, the new line from Farfisa. Exhito has everything that can be desired from a video intercom: flexible state-of-the-art technology designed in a pleasing and innovative shape. A design of character, with a thin discreet profile yet a strong durable construction. Exhito allows many possibilities, thanks to the 7 buttons, 2 for auto switch-on and door opening and a further 5 for intercommunicating calls and additional services, such as bell exclusion. The video intercom is white with a 4" LCD or b/w screen with a grey surround that can easily be replaced by the optional green, blue or silver frames that have been created to enhance the décor of any home.

Today Exhito is able to satisfy with only one monitor the requirements of all technologies, from conventional or reduced wiring analogue systems to FN4000 and DF6000 digital installations. Just select the dedicated wall bracket for the chosen technology. Exhito is now also available for Duo System, the Farfisa digital system with only 2 non-polarized wires. A variety of video kits are also available that include all the products needed for the installation.

Exhito is the line conceived for those who require the best from an electronic product, without compromising a stylish appearance and practicality of use.

Exhito, style in technology.



MONITORS

EX3160C
Dim: mm 211 x 218 x 62
